Dear Hiring Manager,

I am excited to apply for opportunities in **Data Science, Analytics, and Full Stack Development**. With a **Higher Vocational Diploma in Data Science** and a **Diploma in Web Development**, I bring a strong foundation in **Python, SQL, Power BI, React, and Node.js**, along with hands-on experience from academic projects and internships.

During my internship at *Advokatfirman Treschow & Partner*, I developed **Power BI dashboards**, implemented **data models and DAX calculations**, and delivered predictive insights that supported resource planning. In parallel, I have built **full-stack applications (MERN stack)**, developed APIs, and created responsive web solutions. These experiences have allowed me to bridge **data-driven problem solving with scalable software development**.

I am proficient in **machine learning, data visualization, and backend/frontend technologies**, and I thrive in environments where I can contribute to both **data insights and application development**. With strong organizational skills, adaptability, and a passion for continuous learning, I am eager to contribute to dynamic teams and deliver impactful solutions.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experiences can align with your organization's goals.

Sincerely,

Girlie Quindao Razon
